Tech for Palestine - Press Kit

About Tech for Palestine

Tech for Palestine ("T4P") is a coalition of thousands of founders, engineers, product marketers, investors and other professionals who are working in support of Palestinian liberation. The T4P Incubator helps pro-Palestine advocates build, grow, and scale their work towards a Free Palestine. We support projects — whether collections of individuals, registered non-profits, or even companies — whose mission helps Palestine, especially advocacy groups building technical products or in the tech space.
